### Professional Summary

An experienced Software Engineer with a demonstrated history of working in the Computer Software Industry. I am hard-working, innovative, and result-oriented. I excel in front-end and back-end development, database management, and technical program management. I am a team player who can think out of the box to add value and deliver great products.

---

### Professional Experience

#### Start-Up (Stealth Mode), Remote (Bay Area, CA)

*Senior Web Developer, Technical Program Management*

*August 2023 – Present*

- Lead UI development and hands-on development of an application connected to the Finance Industry.
- Developed user-facing tools and services using Angular 13+, Java Spring Boot backend, and MySQL database.
- Created and optimized MySQL views, tables, stored procedures (SPs), and triggers.
- Collaborated with stakeholders to gather and review requirements, define project milestones, and manage project timelines and budgets.

#### Cognizant Technology Solutions, Remote (East Coast)

*Senior Web Developer/Technical Program Management*

*February 2021 – June 2023*

- **CVS Digital Retail** (March 2022 – May 2023): Developed COVID testing flows, designed and developed new forms using wizards and other types of flows, focused on front-end development and API interaction with some web service development using Angular 13, Java, Spring Boot, and MS SQL Server.
- Delivered customer-facing solutions that enhanced user experience and streamlined COVID testing processes, ensuring high performance and scalability.
- Created and managed MS SQL Server views, tables, SPs, triggers, and briefly worked with SQL Server Integration Services (SSIS).
- Part of the Program Management Team: Collaborated with stakeholders to scope projects, define objectives and deliverables, and manage milestones.

**CareFirst BlueCross/BlueShield***Release Lead and Delivery**March 2021 – End 2021*

- Led the offshore team (Chennai) and collaborated with peers and stakeholders on tool development.
- Developed using Angular 4-6.
- Provided mentorship and contributed to program management work on internal products.

**SonicWall, San Jose, CA/Remote (PST)***Senior Web Developer/Program Manager**January 2019 – December 2020*

- **Subject Matter Expert (SME) Role:** Acted as the SME for the development and implementation of complex UI components.
- Managed the product development lifecycle of SonicOS, a complex application with 200+ screens.
- Developed reusable UI components and assisted with backend modules in C++.
- Managed MySQL database schema, created views, tables, SPs, and triggers to support application development.
- Ensured timely and high-quality releases through regular code reviews and progress status meetings.
- Technologies used: TypeScript, VueJS, HTML, CSS, SCSS, Rest API Integration, C++.

**Google, San Francisco, CA***Senior Web Application Developer**June 2018 – December 2018*

- **Shopping Insights Team:** Developed new features, maintained existing ones, and fixed bugs.
- Delivered cutting-edge solutions for the retail sector, focusing on enhancing customer insights and optimizing shopping experiences.
- Conducted unit and end-to-end testing using Scuba, Protractor, Karma, Jasmine.
- Technologies used: Google Cloud, TypeScript, Angular 2.0/4.0, HTML, SCSS.

**NetScout, San Jose, CA***Senior Front End Developer**March 2017 – June 2018*

- **Subject Matter Expert (SME) Role:** Acted as the SME for the development and optimization of the Packet Flow Switch UI monitoring system.
- Maintained the UI for monitoring Packet Flow Switch security devices.
- Developed the Filter feature UI and API integration.
- Technologies used: TypeScript, JavaScript, Angular 2, Angular 1.6, HTML, SCSS.

**Roche Molecular Systems, Pleasanton, CA***Senior UI Developer**May 2016 – February 2017*

- Developed a SPA in Angular 1.4 for DNA sequencing Run Analysis Forensics.
- Technologies used: JavaScript (ES6) with AngularJS and jQuery, HTML5, CSS3, NVD3, HighCharts, Rest API, and Ajax in Angular.

**Google/Sierra Photonics***Front End Engineer**October 2015 – April 2016*

- Developed a real-time graph output application to monitor and maintain state readings of electronic devices.
- Technologies used: WPF, Asp.net, VC++, Couchbase NoSQL, WCF.

**Microsoft***Senior System Developer**June 2015 – September 2015*

- Worked on big data analysis using Asp.net, C#, and MS SQL Server.

**Service Source***Full Stack Engineer**August 2013 – April 2015*

- Developed web-based tools using Asp.net, C#, and MS SQL Server.

**SanDisk***Full Stack Developer**February 2013 – August 2013*

- Conducted data analysis of SSD manufacturing using MS SQL Server and tools.

**Wells***Full Stack Developer**June 2012 – February 2013*

- Developed multiple portals using Asp.net, C#, and MS SQL Server, including some classic ASP.

**WCIRB***Offshore Release Lead**November 2011 – June 2012*

- Led the offshore release team for multiple portal development projects using Asp.net, C#, and MS SQL Server.

**SanDisk***Architect**October 2010 – November 2011*

- Built a quote-generating portal using Asp.net, C#, and MS SQL Server.

---

**Skills**

- **Program Management & Team Lead**
- **Front-End Development:** JavaScript, TypeScript, Angular (2 - 16), AngularJS (1.2 - 1.6), VueJS, HTML (prev, 4 and 5), CSS (prev and 3), SCSS
- **Back-End Development:** Java (8+), Spring Boot, Asp.net, C#, MVC, WCF, WPF (up to 4.5)

- **Database Management:** SQL (MS SQL Server ≤ 2014, MySQL, Oracle), NoSQL (MongoDB, Couchbase)
    - Creating views, tables, stored procedures (SPs), and triggers
    - Experience with SSIS (SQL Server Integration Services)
  - **Development Tools:** Git, GitHub, Docker
  - **Operating Systems:** Linux
  - **Design Tools:** Figma/XD
- 

## Education

### Bachelor of Engineering, Computers

University of Mumbai

---

## Portfolio

*(Git sources available on demand.)*

### Ritchie Bakes:

- [View Site](#)

### Art Is Worship:

- [View Site](#)

Both websites were developed using a personal CMS based on a **common template** built in Angular 12+ and hosted on Google Firebase. **Data Upload Automation**

- Developed a locally running full stack application with Angular 12+, Java, Spring boot to automate some of the data load to the above sites
    - Both sites, being of the same template, have the same loading - updating JSON list files, each JSON which has details on the 'image'
    - Full stack application backend running as a Spring boot webservice is, as on end July 2024, a set of File handling API's - create a file, insert data into a file, etc
-
